User Acceptance Test (UAT)

Assignment: *Supply and Maintenance of a Web-Based Weighbridge Management Software, Digital Mobile Weighbridge Scale and Related Accessories* Tender No. KURA/RMLF/HQ/475/2024-2025

System Name: KURA Web-Based Weighbridge Management System (KURAWEIGH)

Prepared for: Kenya Urban Roads Authority (KURA)

By: Masterspace Solutions Limited

Date:

Report No: IR-03

Table of Contents

Instructions 1
Weighing Module 2
Case Register Module 4
Prosecution Module 5
Case Management Module 6
Reporting and Analytics Module 7
Security and Administration Module 9
Systems Integration 11
Non-Functional Requirements 12
Hardware Integrations 14
Summary of UAT checklist Results 15
Sign-Off 16

Instructions

1. Execute each test scenario as described.
2. Observe the **Actual Result**.
3. Mark **Pass** if the actual result matches the expected result; mark **Fail** otherwise.
4. Use **Remarks** to note issues, observations, or references to defect logs.
5. For failed tests, ensure a corresponding entry is made in the UAT Defect Log.

Weighing Module

Test ID	Test Scenario / Requirement	Status (Pass/Fail)	Remarks
W-01	**Login** – Field officer logs into the system on a laptop (online mode)		
W-02	**Vehicle Details Entry** – Officer selects vehicle class or enters registration number		
W-03	**Scale Integration** – Vehicle passes over Intercomp LS630-WIM scale; system receives weight data		
W-04	**Violation Detection** – GVW exceeds legal limit for vehicle class		
W-05	**Compliant Vehicle** – GVW within limits		

Test ID	Test Scenario / Requirement	Status (Pass/Fail)	Remarks
W-06	**Offline Mode** – Disable network; capture a weighing transaction		
W-07	**Offline Sync** – Restore network connection		
W-08	**GPS Tagging** – Check printed/completed ticket for GPS coordinates		
W-09	**Photo Attachment** – Officer attaches photo of vehicle/load		

Case Register Module

Test ID	Test Scenario / Requirement	Status (Pass/Fail)	Remarks
CR-01	**Automatic Case Creation** – After a violation, system creates a case record (Subfile A)		
CR-02	**Special Release** – Officer selects "Special Release" for a vehicle with a valid permit		
CR-03	**Load Correction Memo** – Officer issues a load correction memo for overload not exceeding certain threshold		
CR-04	**Pay & Exit** – Driver pays fine on-site (mock payment)		
CR-05	**Escalate to Prosecution** – Officer escalates a case for court action		

Prosecution Module

Test ID	Test Scenario / Requirement	Status (Pass/Fail)	Remarks
P-01	**Fine Calculation** – For an escalated case, system calculates fine based on Traffic Act schedules		
P-02	**Invoice Generation** – System generates a charge sheet / invoice		
P-03	**eCitizen Integration** – Process payment via eCitizen		
P-04	**Receipt & Compliance** – After payment, system issues receipt and compliance certificate		
P-05	**Overdue Notification** – Fine remains unpaid beyond grace period (simulated)		

Case Management Module

Test ID	Test Scenario / Requirement	Status (Pass/Fail)	Remarks
CM-01	**Case Details View** – Open a court-escalated case		
CM-02	**Document Upload** – Prosecutor uploads additional documents (e.g., court pleadings)		
CM-03	**Hearing Scheduling** – Enter a court hearing date and outcome (e.g., adjourned)		
CM-04	**Final Disposition** – Enter final ruling (e.g., fined, jailed, acquitted)		
CM-05	**Warrant Generation** – For non-compliant offender, generate warrant		

Reporting and Analytics Module

Test ID	Test Scenario / Requirement	Status (Pass/Fail)	Remarks
R-01	**Dashboard Load** – Load central dashboard		
R-02	**Map View** – View map overlay of weigh stations and violations		
R-03	**Drill-Down** – From a summary report, click on a violation count		
R-04	**Daily Overload Summary** – Generate report		
R-05	**Prosecution Status Report** – Generate report		
R-06	**Revenue Analysis** – Generate revenue report by period		
R-07	**Export to Excel** – Export any report to Excel		

Test ID	Test Scenario / Requirement	Status (Pass/Fail)	Remarks
R-08	**Export to PDF** – Export report to PDF		
R-09	**Custom Report Builder** – Create a new report (select fields, filters)		

Security and Administration Module

Test ID	Test Scenario / Requirement	Status (Pass/Fail)	Remarks
A-01	**User Creation** – Admin creates a new user account		
A-02	**Role Assignment** – Assign a user the "Field Officer" role		
A-03	**Role Restriction** – Field Officer attempts to access prosecution functions		
A-04	**Audit Trail** – Perform actions (create case, edit master data) and then view audit log		
A-05	**Password Policy** – New user sets password that doesn't meet complexity rules		
A-06	**Two-Factor Authentication (2FA)** – Enable 2FA for a user		

Test ID	Test Scenario / Requirement	Status (Pass/Fail)	Remarks
A-07	**System Configuration** – Admin modifies fine amount for a violation type		
A-08	**Backup & Restore** – Initiate a backup (simulated)		

Systems Integration

Test ID	Test Scenario / Requirement	Status (Pass/Fail)	Remarks
I-01	**NTSA Integration** – Enter vehicle registration number		
I-02	**NTSA Failure Handling** – NTSA API unavailable (simulated)		
I-03	**eCitizen Payment** – Complete a payment via eCitizen sandbox		
I-04	**Permit Check** – Enter a permit number (if applicable)		
I-05	**Notification** – Trigger an SMS/Email alert (e.g., violation notice)		

Non-Functional Requirements

Test ID	Test Scenario / Requirement	Status (Pass/Fail)	Remarks
NF-01	**Performance – Dashboard Load** <3 seconds		
NF-02	**Performance – API Response** <2 seconds		
NF-03	**Load Testing** – Simulate 4 concurrent users		
NF-04	**Security – SQL Injection** – Attempt to input SQL code in text fields		
NF-05	**Security – XSS** – Attempt to input script in text fields		
NF-06	**Uptime** – System available during entire test period		
NF-07	**Data Encryption (At Rest)** – Verify database encryption		

Test ID	Test Scenario / Requirement	Status (Pass/Fail)	Remarks
NF-08	**Data Encryption (In Transit)** – Verify HTTPS/TLS 1.3		

Hardware Integrations

Test ID	Test Scenario / Requirement	Status (Pass/Fail)	Remarks
HW-01	**Scale Communication** – Software receives data from Intercomp LS630-WIM		
HW-02	**Printer** – Generate a ticket from the laptop		
HW-03	**Internet Connectivity** – Laptop connects to internet		
HW-04	**Central Monitor** – Dashboard displayed on monitor		
HW-05	**Workstation** –workstation runs dashboard without performance issues		

Summary of UAT checklist Results

Module	**Total Tests**	**Passed**	**Failed**	**Pass Rate (%)**
Weighing				
Case Register				
Prosecution				
Case Management				
Reporting & Analytics				
Security & Admin				
Integration				
Non-Functional				
Hardware Integration				
TOTAL				

Sign-Off

We, the undersigned, confirm that the above checklist has been completed and accurately represents the outcome of the User Acceptance Testing.
